Application Transition Roadmap: App Waves and Staff Pathway
Total Migration Volume: 581 Applications

Phase 1: "Lift-and-Shift"
- Quick migration with little risk
- No changes to business logic
- Migrated in an automated manner using virtual machine migration toolset or third-party toolset
- Minimal resources required from application team (QA only)

Phase 2: Replatform
- Manual intervention required
- Code changes expected to optimize deployment to cloud
- Map to application patterns
- Requires commitment from development team (dev, QA)

Phase 3: Rearchitect/New
- Significant code changes required
- Technologies not supported in cloud
- Application upgrades or new applications
- Requires commitment from architecture and development teams (arch, dev, QA)

Phase 4: DR Solutions

Already Migrated: 7%, 42 apps
- ATS: 1 app
- Campus Services: 38 apps
- IAM: 2 apps

Staffing
- Add 15 to team
- At end, transition to permanent placements
- Some to remain as mentors or for second-wave assignments
